SUMMARY

Staff Frontend Engineer with 13+ years of experience architecting scalable frontend platforms using React and TypeScript. Designed and governed micro-frontend platform architecture from scratch across 11 engineering teams (~110 engineers), enabling independent deployments and scalable system evolution. Expertise in frontend platform engineering, system design, performance optimization, observability, and developer tooling. Proven track record improving system reliability, deployment velocity, and application performance at scale.

Independent Staff Frontend Engineer | Platform Architecture & AI Developer Tooling | Sep 2025 – Present

- Architected **AI Code Assistant**, integrating repository context and architectural metadata to improve developer productivity and system understanding
- Built **AlgoDuel**, an AI-assisted React platform enabling architecture validation, experimentation, and performance benchmarking
- Designed micro-frontend platform prototypes using modular runtime isolation and independent deployment architecture

Celigo — Senior Staff Frontend Engineer | Integration Platform | 2023 – Sep 2025

- One of two frontend platform architects governing frontend architecture across 11 teams (~110 engineers)
- Architected micro-frontend platform from scratch using modular architecture enabling independent deployments and scalable system evolution
- Defined platform architecture standards, system boundaries, and governance improving maintainability and scalability
- Designed frontend observability platform enabling performance monitoring, reliability tracking, and proactive issue detection
- Improved deployment frequency by 2× and reduced production defects by 47% through platform architecture improvements

Upstox — Staff Frontend Engineer | Trading Platform | 2023

- Architected React frontend supporting real-time trading workflows and high-frequency data rendering
- Reduced interaction latency from ~450ms to under 40ms through performance engineering and system design optimization

Lowe's — Tech Lead Frontend Engineer | Fortune 50 Retail | 2021 – 2023

- Led frontend modernization using React and micro-frontend architecture improving scalability and deployment independence

- Reduced page load time from ~8 seconds to ~2.5 seconds improving performance and reliability

ITC Infotech — Tech Lead Frontend Engineer | Enterprise Software | 2018 – 2021

- Led frontend platform architecture initiatives improving scalability, maintainability, and engineering efficiency

LeadVenture — Senior Frontend Engineer | SaaS Platform | 2016 – 2018

- Built scalable frontend platform systems using React and modern JavaScript

golbibo — Frontend Engineer | Consumer Travel Platform | 2015 – 2016

- Developed high-scale frontend systems used by millions of users

Tesco / Moonraft — Frontend Engineer | Ecommerce Platform | 2012 – 2014

- Developed production frontend applications and platform features

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS

Architecture: Micro-frontends, Platform Architecture, System Design, Scalable Systems

Platform Engineering: Observability, Performance Optimization, CI/CD, GitHub Actions, AWS

AI Development: Cursor, GitHub Copilot, ChatGPT, AI-assisted development

EDUCATION

Bachelor of Engineering — Electronics & Telecommunications

RV College of Engineering, Bengaluru | 2008 – 2012
